ADDITIONAL STATEMENTS

THE NASA AUTHORIZATION BILL FOR FISCAL YEAR 1996

• Mr. BURNS. Mr. President, yesterday, Senator PRESSLER and I introduced the NASA authorization bill for fiscal year 1996 which I have enthusiastically cosponsored. The bill authorizes a total of \$13.8 billion for the agency, a 3-percent decrease from the requested level of \$14.26 billion. That funding should allow NASA to continue the important missions that already are underway such as space station, Mission to Planet Earth, and the aeronautics and space science programs. It should also prepare NASA for the future by authorizing several new missions, such as an effort to develop a shuttle replacement and a new radar satellite program.

Mr. President, as you know, we are in a budget crisis of sorts and NASA deserves a great deal of credit as one of few Federal agencies to respond to it early and responsibly. In 3 years, NASA cut the space shuttle budget from \$4 billion to \$3.1 billion. It developed a redesign of space station that was \$5 billion less expensive than the earlier space station *Freedom* concept. Mission to Planet Earth has been reduced from a \$17 billion armada of satellites to a \$7 billion focused satellite system. Earlier this year, faced with the prospect of deep congressional budget cuts across all of the Government, NASA took the initiative and developed a plan to cut \$5 billion in 5 years, without reducing program content.

But NASA did not stop there. This year, it conducted a comprehensive zero-based review of all of its activities and programs to achieve even greater savings. That review looked at a broad range of money-saving measures such as work force reductions, elimination of redundant activities, consolidation of functions, and operating more efficiently. I understand that, within the administration, NASA's efforts are often cited as the model for reinventing government.

After 3 consecutive years of brutal budget cuts, NASA is now down to the bone. To require additional reductions would force NASA to cancel important space programs, close vital facilities, or layoff essential skilled personnel. That would decimate the Nation's science and technology base. Equally important, it would decimate the morale of the good men and women who
